Monthly No. 973-10-13

NEW YORK SMALL GRAINS - 2013 SUMMARY

The 2013 New York **winter wheat** crop was estimated at 7.82 million bushels, 46 percent above last year's production. Area harvested was 115,000 acres, up 35 percent from a year ago. Yields are estimated at a record high 68 bushels per acre, 5 bushels more than last year.

New York **oats** totaled 3.08 million bushels, a decrease of 5 percent from last year. Area for harvest decreased 8 percent to 46,000 acres. Yields are estimated at 67 bushels per acre, up 2 bushels from last year.

Barley production in the Empire State is estimated at 416,000 bushels, up 11 percent from last year. Area for harvest totaled 8,000 acres, unchanged from a year ago. Yields averaged 52 bushels per acre, up 5 bushels from 2012.

U.S. wheat production totaled 2.13 billion bushels in 2013, down 6 percent from 2012. Grain area totaled 45.2 million acres, down 8 percent from the previous year. The United States yield is estimated at a record high 47.1 bushels per acre, up 0.8 bushel from the previous year.

U.S. **oat** production is estimated at 66.0 million bushels, up 3 percent from 2012. Yield is estimated at 64.0 bushels per acre, up 2.7 bushels from the previous year. Harvested area, at 1.03 million acres, is slightly below last year. This is the second smallest acreage harvested for grain on record.

Barley production is estimated at 215 million bushels, down 2 percent from 2012. Average yield per acre, at 71.7 bushels, is up 3.8 bushels from the previous year. Producers seeded 3.48 million acres in 2013, down 4 percent from last year. Harvested area, at 3.00 million acres, is down 8 percent from 2012.

SEPTEMBER MILK PRICES INCREASED FROM AUGUST

Prices received by New York producers for milk sold during September were up from a month earlier. The price of corn decreased while the hay price remained the same. Many previous month prices were revised due to more complete sales information.

Grain corn, at \$5.36 per bushel, was down \$1.18 from August and \$2.67 below September 2012 prices. Hay averaged \$152 per ton, equivalent to last month's price, but up \$15 from September 2012.

Dairy farmers in the Empire State received an average of \$20.80 per hundredweight of milk sold during September, up 20 cents from August and 80 cents more than September 2012.

The preliminary All Farm Products Index of Prices Received by Farmers in September, at 185 percent, based on 1990-1992=100, decreased 4 points (2.1 percent) from August. The Crop Index is down 8 points (3.7 percent) and the Livestock Index decreased 1 point (0.6 percent). Producers received lower prices for corn, hogs, and wheat and higher prices for calves, milk, and cattle. In addition to prices, the overall index is also affected by the seasonal change based on a 3-year average mix of commodities producers sell. Increased monthly movement of soybeans, corn, potatoes, and hogs offset the decreased marketing of wheat, cattle, cotton, and broilers.

NEW YORK EGG PRODUCTION UP 3 PERCENT IN AUGUST

Egg production on New York farms totaled 109 million eggs in August 2013, down 2 percent from last year. The number of hens and pullets of laying age, at 4.44 million, increased 1 percent from August 2012 and the rate of lay decreased 3 percent to 2,456 eggs per 100 layers.

United States egg production totaled 8.04 billion during August 2013, up 3 percent from last year. Production included 6.95 billion table eggs, and 1.08 billion hatching eggs, of which 1.00 billion were broiler-type and 80 million were egg-type. The total number of layers during August 2013 averaged 346 million, up 3 percent from last year. August egg production per 100 layers was 2,322 eggs, down slightly from August 2012.
